PROJECTS

- Developed and maintained multiple web applications using Laravel, CodeIgniter, and CakePHP, ensuring adherence to coding standards and security best practices.
- Architected scalable database schemas and optimised MySQL queries, reducing query execution time by up to 40% in high-traffic projects.
- Built RESTful APIs to integrate with third-party services (payment gateways, CRMs, shipping providers), enabling seamless automation of business workflows.
- Optimised performance of client applications, achieving load time improvements from 3.5s → 1.2s and supporting 5,000+ concurrent users without downtime.
- Collaborated with front-end teams to integrate Vue.js/React-based UIs with PHP backends, ensuring pixel-perfect, responsive web experiences.
- Led code reviews and mentored junior developers, improving overall team efficiency and code quality.
- Developed reusable components and libraries, reducing development time for new projects by 25%.
- Troubleshot and debugged production issues in real-time, ensuring 99.9% uptime for mission-critical client platforms.
- Participated in Agile processes (sprint planning, daily standups, retrospectives), ensuring on-time delivery across distributed teams in India, the US, and Europe.
- Integrated Shopify and WordPress solutions for e-commerce clients, driving measurable increases in sales conversion rates.
